

**Black-out parking striping in noncompliant asphalt parking area**

**New ADA compliant curb ramp**

**Remove noncompliant asphalt and replace with new ADA compliant concrete parking stalls and access aisle**

A franchise business owner requested a speedy completion of exterior ADA barrier removal. Protrk's design-build team quickly assessed the existing condition and provided a solution. By relocating and raising the new ADA compliant parking stalls slightly, Protrk minimized the area of concrete walk that was required to be replaced, saving both time and budget on this fast-track project.

The existing designated ADA parking required remediation. By moving the new ADA complaint parking closer to the business entrance and balancing the grade differences, Protrk delivered compact, budget friendly solution for this business owner.
